## Design Phase 2

## **Technical Architecture**

Date	08 November 2022	
Team ID	PNT2022TMID28916	
Project Name	Project - Visualizing and Predicting Heart Diseases with an Interactive Dash Board	
Maximum Marks	4 Marks	

S.No	Is it?	Description
1	System Robust	Yes, this heart disease prediction can easily cope with any unexpected errors easily.
2	Highly Modifiable	Our project is very easy to modify and it also offers us a reusability feature that is easy to modify and customize the data accordingly.
3	Scalable	Yes, it is scalable. Our dashboard easily takes out changes that are, it immediately modifies the data which is given by the user.
4	Buildable	It is easy and very simple to both use and it is available for free of cost(other than the cloud we use)
